...PROVIDING YOU WITH FLUID SOLUTIONS...

Submersible pumps offer many advantages to our day to day lives. However, with those benefits come new challenges. As we all know, there has yet to be a "light-weight" submersible invented. To that end, MPE recognizes that most cities and townships do not necessarily have the means to economically pull and replace their submersible pumps. With that in mind, Magnolia Pump & Equipment is now offering boom truck service to help meet your needs. With a lifting capacity to 5000lbs, your biggest problems can be met with ease from our service department.

MPE offers a wide variety of service work to meet your needs including:

- *Pump Removal/Installation*
- *Grinder Pump Repair/Rebuilds*
- *Self Primer Repair/Rebuilds*
- *Panel Restorations and Installation*
- *SCADA Integration/ Component Upgrade*
- *Water Well Panel Repairs/Upgrades*

Water Booster system acting up? We offer a booster system control solution that will take the Pressure off of you and your maintenance crew.
