

PRE-FABRICATED
LIFT STATIONS

Magnolia Pump & Equipment Inc.

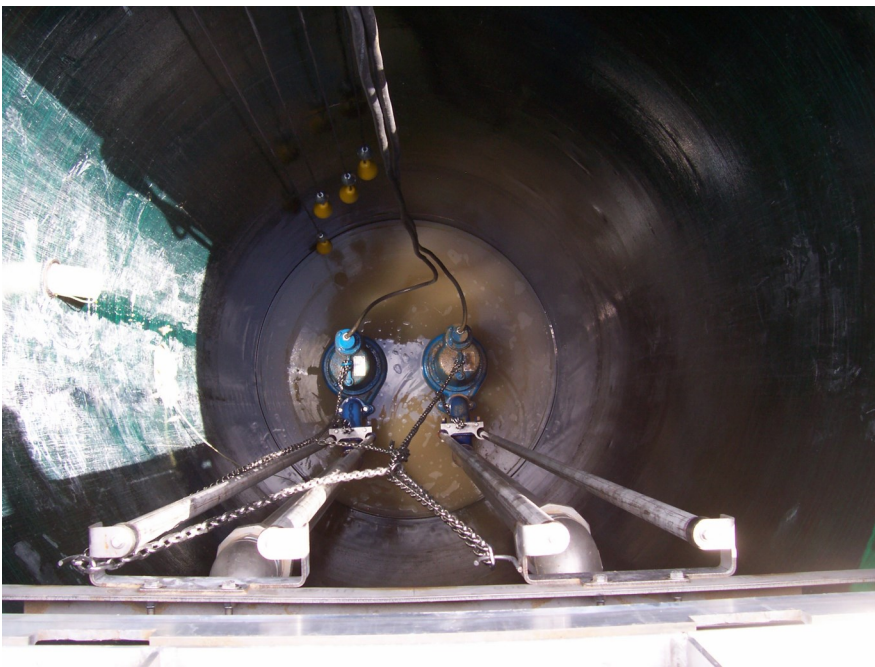

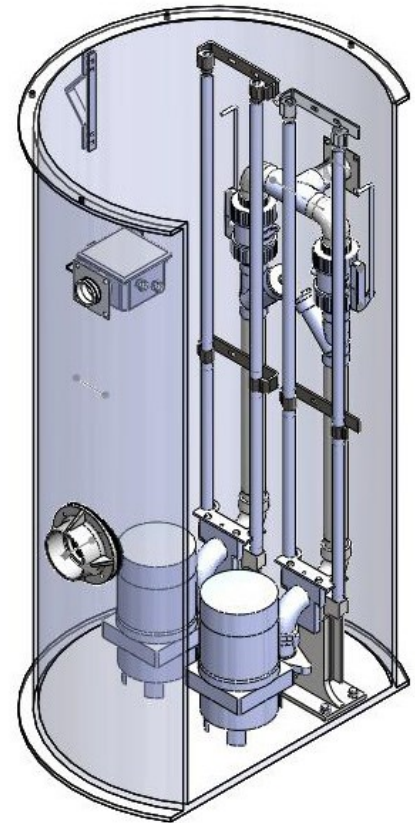

www.MagnoliaPump.com

...PROVIDING YOU WITH FLUID SOLUTION...

Completely fabricated at our Pelahatchie, MS warehouse, our pre-fabricated pump stations can be built exactly as you want them. With sizes from 24x48 and up, our systems can be built with or without rail systems and grinder or non-clog pumps.

We also offer custom built, stand alone valve boxes as well as fiberglass basins with attached valve boxes. (see reverse side for more)

Just let us know how much and how far you need to pump and let us do the rest. Magnolia Pump is proud to offer full service in house design of your low pressure sewer system. Let us put our experience to work for you!

We keep 24x48, 24x60, and 24x72 in stock and ready for immediate delivery. Larger designs allow 2 weeks for delivery.

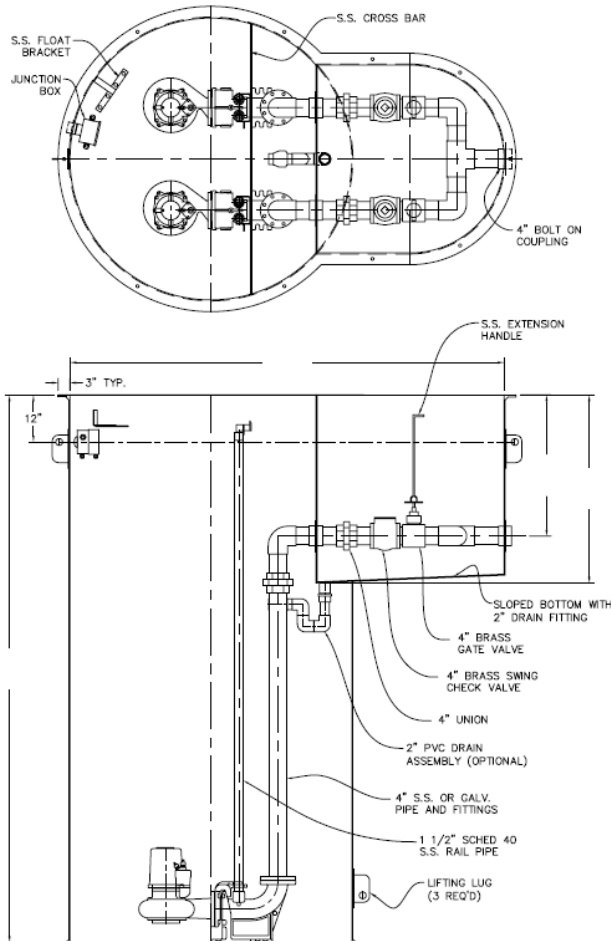

Magnolia Pump is Proud to also offer all of the following:

- Custom built panels
- Our shop to your site delivery
- Full range of parts to repair your existing Pre-Fab stations including, rail systems, rail pipe, float hangers, chain, discharge hubs, and much more.
- Aluminum hatch covers with or without safety grates.

And you can always count on Magnolia Pump for complete lines of pumps to meet all of your submersible wastewater needs.

ABOVE: One of our standard 12' basins being delivered to the job site.

Application Example:

- 10HP 230V Three Phase Non Clog Pumps
- 4" Discharge Hub
